DETAILED ACTION

Recapture

1. Claims 1-66 are rejected under 35 U.S.C. 251 as being an improper recapture of broadened claimed subject matter surrendered in the application for the patent upon which the present reissue is based. See *Hester Industries, Inc.* v. *Stein, Inc.*, 142 F.3d 1472, 46 USPQ2d 1641 (Fed. Cir. 1998); *In re Clement,* 131 F.3d 1464, 45 USPQ2d 1161 (Fed. Cir. 1997); *Ball Corp.* v. *United States*, 729 F.2d 1429, 1436, 221 USPQ 289, 295 (Fed. Cir. 1984). A broadening aspect is present in the reissue which was not present in the application for patent. The record of the application for the patent shows that the broadening aspect (in the reissue) relates to subject matter that applicant previously surrendered during the prosecution of the application. Accordingly, the narrow scope of the claims in the patent was not an error within the meaning of 35 U.S.C. 251, and the broader scope surrendered in the application for the patent cannot be recaptured by the filing of the present reissue application.

Claims 65 and 66 lack limitations specifically argued in the patented parent.

Applicant has argued that the following features were not taught in the prior art:

1.) Encoded TOC information recorded in the lead-in area using a long-distance ECC with at least 8 parity symbols (argued in reply in parent application paper #5, page 4 and paper #8, page 3).

Application/Control Number: 09/522,786

Art Unit: 2133

2.) TOC information including addresses of respective start sectors, each address identifying a start sector of a respective user track (argued in reply in parent application paper #5, page 3).

Assignee Assent

2. This application is objected to under 37 CFR 1.172(a) as lacking the written consent of all assignees owning an undivided interest in the patent. The consent of the assignee must be in compliance with 37 CFR 1.172. See MPEP § 1410.01.

The assent of the assignee is defective in that it is not clearly signed by someone having the apparent authority to sign (e.g. president, vice president of the corporation) or by someone specifically authorized to sign the assent. See MPEP 324.

A proper assent of the assignee in compliance with 37 CFR 1.172 and 3.73 is required in reply to this Office action.

Reissue Amendment Form

3. Applicant is notified that any subsequent amendment to the specification and/or claims must comply with 37 CFR 1.121(b).

The amendment filed 21 December 2000 is not in proper form, as all of claims 65 and 66 should be underlined. See also 37 CFR 1.173.
